Viellissement, aide et soins de sante en Belgique - Pacolet et al 2005.pdf

Dear Sebastian,

Apologizes for the delay !

There exist an interesting document (in French and in Dutch, it doesn't exist in English), here enclosed) published by the Belgian Social Security administration: <http://www.socialsecurity.fgov.be/fr/over-de-fod/organogram/sociaal-beleid/>

In this document (Pacolet et al) the health care for elder people in Belgium is detailed.

The document describes the situation in 2005. Anyway, if you need more precise or perhaps more updated information I can put you in contact with Jozef Pacolet with whom I collaborated in a project over the last years.

We keep in contact.

Best regards,

Sergio

Dear Mr. Perelman,

I have found our contacts on the website of the SHARE program. I'm preparing my master thesis at the university of Münster in Germany and studying hospital management.

I'm looking for an overview about the Belgian health care system for elder people. Maybe, you can send me some good internet links or can explain me shortly who is responsible in Belgium for the elder care und which services are provided (public and private). If you know any eBooks or studies dealing with the topic of ageing, retirement and health of elder people it would be nice when you send me the right link oder PDF. It would be a great support for my thesis.

I appreciate your time and work. Thanks a lot in advance.

Best Regards

Sebastian Eckert
